

Job Vacancy:

Quality Technician

Gateshead, UK

The Company:

Turbo Power Systems Limited is an established Company with 40+ years of experience in designing, developing, qualifying and manufacturing high performance electric motors, generators, drives and power electronics, from kW to multi MW and from 3,600 rpm to 160,000 rpm. We offer bespoke solutions to a variety of markets including the rail, aerospace, energy, military, and industrial markets. The Company has a global footprint with successful project execution in UK, USA, Canada, Netherlands, Turkey, Brazil, Middle East and Malaysia. Our success is based upon complete turnkey support i.e. in design, manufacturing through to Installation and through life support of products. The Company has bases in Gateshead and Castle Donnington.

The Role:

The successful candidate will carry out inspection of items, components & products to determine their acceptability against agreed standards, and to recommend improvements where necessary.

You will ensure all incoming items, and internal and outgoing products are inspected in a timely manner, to all relevant standards, identifying and reporting any potential improvements to products and processes. You will conduct first article inspections, prepare inspection packs and certificates of conformance, and conduct cell manufacturing audits and internal H&S and Quality audits.

Qualifications & Experience:

Ideally the successful candidate will be qualified to NVQ level 2 or above in a Manufacturing related discipline, preferably in quality assurance, with experience of conducting internal cell, H&S and Quality audits within a similar manufacturing environment. The ability to read engineering / electrical drawings is essential for this role.

IPC awareness, knowledge of Fabrication / Welding and Geometric Symbols and tolerancing would be advantageous.

Report:

The role will report directly to the Head of Quality and Health and Safety and you will be responsible for delivering the near-term objectives laid out by management.

Hours of Work: 40 hpw, Monday to Friday

Job Types: Full-time, Permanent

Experience:

- Working within a similar manufacturing environment: 1 year (Required)
- Conducting internal cell, H&S and Quality audits: 1 year (Required)
- Reading engineering / electrical drawings: 1 year (Required)
